

Justifiably, more and more people are losing confidence in the dominant politics. But what lessons do the workers and the masses in the world draw from the extensive crises? Bourgeois ideology has lost its power of attraction and is in deep crisis. An ideological struggle over interpretation and conclusions has broken out. Since the open crisis of reformism and modern revisionism, anticommunism has become the main obstacle in the building of the consciousness of the masses. However, anticommunism itself is in crisis, causing it to be constantly modified. This book follows the conviction that the time is ripe for an ideological offensive of scientific socialism.

The books, *Götterdämmerung Over the "New World Order," Dawn of the International Socialist Revolution,* and *Catastrophe Alert! What Is to Be Done Against the Willful Destruction of the Unity of Humanity and Nature?* contain the analysis of the reorganization of international capitalist production as new phase of imperialism, along with the conclusions for the strategy and tactics of the international socialist revolution. This book has the task to complete this by dealing with the ideological side. It is the first of four volumes of the work, *The Crisis of Bourgeois Ideology, and the Doctrine of the Mode of Thinking,* which will be published as Nos. 36 to 39 of the *Revolutionärer Weg* series.

Stefan Engel, born in 1954, is a trained mechanic and works today as a free publicist. Since 1968 he has been actively involved in the building of the MLPD, and since 1975 has been one of its leading representatives. From the late 1980s up until 2016 he held positions of responsibility in the international revolutionary working-class movement.

Since 1991 he has been head of the editorial team of *Revolutionärer Weg*.

THE CRISIS

OF BOURGEOIS IDEOLOGY AND OF ANTICOMMUNISM

www.neuerweg.de

Paperback, 208 pages, 16,00 euros
ISBN 978-3-88021-598-6, E-book: 12,99 euros
ISBN 978-3-88021-599-3

UNIQUE

The system of *Revolutionärer Weg* is unique in the world. In meanwhile 36 issues it has developed Marxism-Leninism further in a comprehensive way: regarding the betrayal of socialism, the analysis of state-monopoly capitalism, the Marxist-Leninist line for the building of a new revolutionary workers' party; on the environmental issue, on the struggle for the liberation of women, on the work in enterprises and trade unions, on the dialectical method, on the doctrine of the mode of thinking, on political economy, on the struggle against imperialist wars, on the liberation from neocolonial exploitation and oppression, on the strategy and tactics of the preparation of the international socialist revolution, and on revolutionary party building.

Work currently is in progress on numbers 37 to 39, which will deal with the crisis of bourgeois ideology and the further development of the doctrine of the mode of thinking.

OPINIONS ABOUT THE BOOK

”

“The young are fighting for their future and need an ideology of the future, scientific socialism. It is a challenging book, and this is exactly why I recommend it for every young person to read.”

“Criticism of capitalism is widespread among my colleagues. Anticommunism is the problem! It prevents people getting the right perspective. Reading the book helps us understand where it comes from and shows us how we can deal with it.”

”

”

“I recommend the book to anyone who does not want to despair about the state of the capitalist health system, but seeks new prospects.”

Table of Contents:

Introduction
